*Making Sure the Message is
Seen and Heard*

A lot goes into our worship services and special events, especially in the areas of sound, video, lighting, and soon to be audio and video podcasting. We need a committed team of people to

- set up sound equipment
- operate the sound board
- operate computer power point files
- operate theater style lighting
- operate recording equipment

We're looking for reliable people to be part of our technical team. Some experience working with audio/video equipment is desirable. Training can be provided.

If you love technology and want to part of getting the Word out, consider being part of our Worship Technical Ministry Team!

We're better together!
